## CONTENTS

Foreword .....	iii
<b>Constitutive equations</b>	
<i>P. Filip, J. David</i> : On the number of parameters in the empirical constitutive equations .....	1
<i>R. Pivokonský, M. Zatloukal, P. Filip</i> : On the predictive/fitting capabilities of XPP and PTT-XPP constitutive equations for branched LDPE melts.....	11
<b>Non-Newtonian fluid mechanics</b>	
<i>K. Chaloupková, M. Zatloukal</i> : Theoretical and experimental analysis of viscoelastic polymer melt extrusion .....	22
<i>I. Machač, H. Bendová, B. Šiška</i> : Flow of viscoelastic liquids through fixed beds of particles .....	31
<i>F. Rieger</i> : Power consumption of agitators in non-Newtonian fluids.....	44
<i>J. Tihon</i> : Stability of a non-Newtonian film flow down an inclined plane .....	48
<i>M. Zatloukal, P. Sába</i> : Modeling of polymer processing in area of highly non-linear viscoelasticity.....	54
<b>Polymer melts</b>	
<i>I. Fortelný</i> : Phase structure development in flowing polymer blends.....	61
<i>N. Honková, B. Hausnerová, T. Kitano, P. Sába</i> : PP/PET blends: modification and flow properties.....	68
<i>J. Mikešová, M. Nevoralová</i> : Effects of $\gamma$ -irradiation on rheological properties of ultra-high molecular weight polyethylene melts.....	75
<i>M. Obadal, R. Čermák, K. Stoklasa, V. Habrová</i> : Self-reinforcement of polymers as a consequence of flow-induced crystallization .....	81
<i>T. Sedláček, M. Zatloukal, P. Sába</i> : Pressure-temperature dependencies of viscosity behaviour of polymer melts.....	86
<i>R. Slezák, B. Hausnerová, P. Sába</i> : Apparent wall slip of tungsten carbide based feedstock for powder injection moulding.....	94
<b>Suspensions and solutions</b>	
<i>J. Andertová, I. Zedníková</i> : Colloidal rheology of zirconia and zirconia-alumina mixed suspensions.....	99
<i>M. Chytil, M. Pekař</i> : Rheological study of hyaluronic solutions .....	105
<i>A. Lengálová, V. Pavlínek, P. Sába</i> : Viscosity of suspensions in electric field .....	109
<i>V. Pavlínek, A. Lengálová, P. Sába, O. Quadrát, J. Stejskal</i> : Electrorheological properties of silica modified with polyaniline.....	114
<i>I. Zedníková, J. Andertová, P. Štern, F. Rieger</i> : Rheological behaviour of viscoelastic paste for preparation bioceramic .....	119
